

Announcement of Participation in Expo 2025 Osaka, Kansai, Japan

Two products from Union Corporation and one product from Union Doortech Co., Ltd. will be exhibited at Expo 2025 Osaka, Kansai, Japan.

What might “The door of the future” look like?

It could be an automatic door that opens and closes faster, more quietly, and with greater ease for everyone.

But is a future where doors are fully controlled by sensors and AI truly ideal?

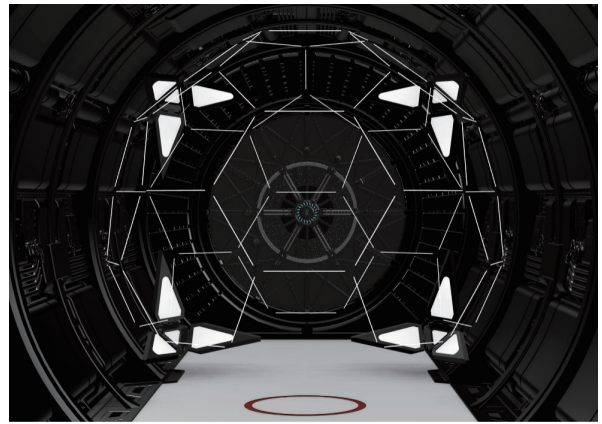

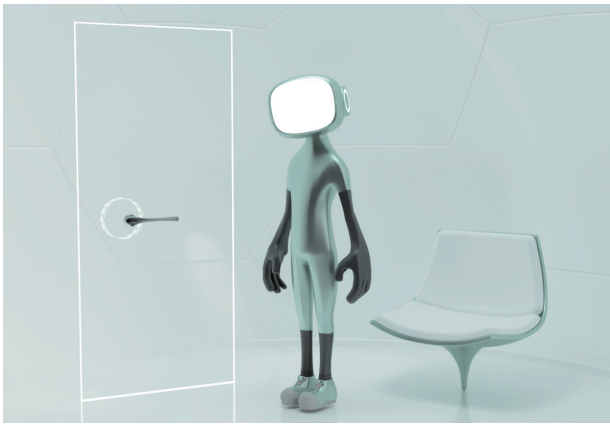

Doors that open or close against our will can sometimes feel uncomfortable.

At UNION, we believe the door of the future is one that restores human senses—

a door that reflects human intention and allows us to open boundaries with purpose.
